

PROJECT CASE STUDY PRIMARY HEALTHCARE CONTAINER FACILITY MAUBANE

LTE Medical Solutions in partnership with Samsung and the North West Department of Health was contracted to design, build, equip and support a solar powered container solution in Maubane, South Africa. The clinic offers primary healthcare services comprising of maternal & child services, a dental clinic and a laboratory facility. The facility, offered as a turnkey solution, is fully equipped with all medical equipment and can be expanded and upgraded to offer more specialized services as the need arises.

The entire facility operates using solar power and offers off the grid operation with a 2 day redundancy built into the system. The facility is built and tested before shipping and commissioning on-site, allowing for fast deployment and relocation to any geographical location that might be required.
