

PROJECT CASE STUDY MOBILE TUBERCULOSIS SCREENING CLINIC

MOZAMBIQUE

The Global Fund and the Mozambican Ministry of Health appointed LTE Medical Solutions to design, build, equip and support a fleet of mobile Tuberculosis (TB) survey clinics consisting of an X-Ray and laboratory facilities. The clinics are built on 6x4 truck chassis offering TB screening services in isolated and rural parts of Mozambique with capability to screen more than a 100 patients per day.

The clinics are fully equipped with the latest in digital radiology equipment, point of care laboratory testing equipment, computer aided and cloud reporting imaging software. With the combination of a built in hybrid PV solar & diesel generator and plug-in utility power, water tanks as well as extended fuel tanks, the clinics are fully self-sustained and capable of extended operating in remote areas.

LTE offers turnkey solutions to our clients and we pride ourselves on being the leaders in mobile and alternative healthcare solutions.
